Hashimoto's Thyroiditis Guide

Treatment techniques based in Chinese medicine

# What is Hashimoto's Thyroiditis?

The thyroid is a small butterfly-shaped gland in the neck, just in front of the windpipe (trachea). It produces hormones that affect things such as heart rate and body temperature.

Thyroiditis is swelling (inflammation) of the thyroid gland. It causes either unusually high or low levels of thyroid hormones in the blood. There are several different types of thyroiditis.

Hashimoto's thyroiditis is caused by the immune system attacking the thyroid gland, making it swell and become damaged. According to the NHS, as the thyroid is destroyed over time, it becomes unable to produce enough thyroid hormone. This leads to symptoms of an underactive thyroid gland (hypothyroidism), such as tiredness, weight gain and dry skin. The swollen thyroid may also cause a goitre (lump) to form in the throat.

What causes the immune system to attack the thyroid gland is unknown, however, Hashimoto's thyroiditis is usually seen in women aged 30 to 50 and it sometimes runs in families.

Western medicine does not believe it can be cured, but symptoms can be treated with medication usually taken for life, or in rare cases such as a painful swollen goitre, surgery.

# The Yang Sheng perspective

‘Yang Sheng’ means ‘nurture life’. It is the ‘self-care’ part of Chinese medicine: the part you can do for yourself, as a complement to any other treatment you may be undertaking.

In addition to physical (visible) symptoms, in Chinese medicine we also consider what is happening with the body at an energetic (invisible) level. ‘Qi’ (pronounced ‘tchee’) is the energy that runs through all of us. Even when you sit completely still, there will be some movement happening inside you: your heart is beating, your fluids moving – every cell is constantly in motion. All of these different types of energy, combined with your breath, is what makes up your ‘qi’.

Qi isn’t the same as circulation, but they are linked. When you stimulate your blood flow or move your lymphatic fluid, your qi is also stimulated. Everything flows together. The channels in which qi flows are called meridians. According to Chinese medicine, the quality and movement of qi through the body determines your health.

The ideal state is one of smooth flow with no imbalances or blockages, which are called ‘stagnation’ or stagnant qi. If you have stagnation, whether physical, emotional or spiritual, this will eventually manifest as disease.

In Chinese medicine, Hashimoto’s thyroiditis, as an autoimmune disorder that can cause hypothyroidism or underactive thyroid, is considered due to genetic reasons, over tiredness, mental stress, environmental pollution, or an imbalanced diet especially with regard to iodine intake.

However, since Hashimoto’s thyroiditis is also an autoimmune disease, we must try to understand why the immune system is attacking the body’s own tissues instead of fighting infections. This, according to Chinese medicine, is due to a lack of Zheng qi. This type of qi is derived from eating healthy foods. Since the stomach and spleen are responsible for the digestion and intake process, if we take more care of our digestive system, our body will protect itself much better.

# Steps you can take to help

## General advice

Chinese breathing and bodywork techniques have both been scientifically proven to be effective in reducing stress and supporting the body. They:

- Engage the parasympathetic nervous system
- Regulate blood flow
- Reduce heat in the body
- Calm the nervous system
- Strengthen the organs

# Breath & Thyroiditis

The single most effective way to reduce your stress levels is to take conscious, deep, abdominal breaths. By moving your awareness out of your head and into your breath, your heart rate slows, your mind is calmed, and your blood oxygenated.

# Qigong & Thyroiditis

Qigong is a fundamental pillar of Chinese medicine. It is classed as a form of internal exercise. Internal exercise is any combination of slow, considered movements with breath and mental engagement, it's often referred to as 'Chinese yoga'. Qigong is, quite simply, the ultimate selfhealing technique. Whatever your issue, qigong will help to rebalance the body. By learning to manipulate qi around the body, you rejuvenate and energise, lower the heart rate and blood pressure and support the immune system.

# Tapping & Thyroiditis

Tapping with bamboo is an ancient Chinese therapy that works wonders for your general wellbeing. It's a simple, pleasurable, yet hugely effective way to support and maintain your health, no matter what your age or physical state. Tapping the skin on a daily basis enables the free flow of this all-important circulation. In as little as one minute a day, an all over body tap can clear areas of stagnation, support lymphatic drainage and encourage a smooth flow of blood and qi around the body. Think of it as a natural battery charger for the body.

# Gua sha & Thyroiditis

Gua sha is a therapeutic healing technique that has been widely practised in China for thousands of years. It involves using a round-edged tool, traditionally made from materials such as jade or metal, to pressstroke the skin until redness appears. You can even use a jam jar lid! Gua sha has been used to treat a whole range of conditions from fever to chronic cough and migraines. It has been shown in studies to increase micro-circulation by 400%, and clear inflammation. Note that gua sha should NOT be used directly on broken skin. However, it can be effective to lessen the marks left by an acne outbreak. There are lots of how-to gua sha videos on my [Instagram](#) feed; and you can also download the Gua Sha Guide.

# Specific advice

Any symptoms of ill health will always relate to one of the five key organs we consider when we are treating in Chinese medicine. These are Heart, Lung, Liver, Stomach/Spleen and Kidney.

Depending on what your symptoms are, it will usually indicate an imbalance in a specific organ. For example, palpitations are concerned with the heart.

An energetic imbalance does not mean you have a dramatic health issue. This aspect of Chinese medicine is about prevention, not cure. That means reading the subtle signs and symptoms of the body daily. Imbalance starts at an energetic level and you rectify it at an energetic level.

The more serious the symptoms, the deeper the imbalance. If the symptom is mild – e.g. low-level anxiety before a meeting or mild rosacea after a glass of red wine, the imbalance will be easier to rectify.

It is important to know that when I refer to organ imbalance, I mean energetic and not physical. So, for example, heart imbalance does not mean heart disease. It is a subtle signal that your body is not in balance and the strain of that is impacting your heart energy, which may eventually lead to an issue over time.

[info@katiebrindle.com](mailto:info@katiebrindle.com)

In the first instance, it could be felt as low level anxiety, occasional palpitations or a lack of desire to socialise. We look for the low level signs to stop things getting a foothold in the body and causing a greater problem further down the line.

Use low levels symptoms as a barometer of your wellness. Address them to keep the body healthy and they are much less likely to become a deeper issue. This is the principle behind yang sheng and self-care. There are many techniques rooted in Chinese medicine that can help with Hashimoto's thyroiditis, including foot bathing, gua sha, food therapy and having a healthy daily routine including enough sleep, regular exercise and a suitable amount of sun.
